Acronis
The Best Backup Approach

Acronis True Image 2015 products offer dual protection to any computer (and all of its data) with the most secure, complete, and easy-to-use backup solution.

On March 5th, 2015, Gene Barlow will speak about the latest Acronis product via Skype from Utah to let us know the ins and outs of various data backup approaches and help us ensure the safety and preservation of our personal data.

Backing up a computer's hard drive on a regular basis is the best way to protect the hard drive from system crashes and failures. Unfortunately, although there are many ways to do backups, most of them do not adequately protect the computer. Gene's talk will help us to understand the best way to backup the computer system.

For further information, contact Tom Osbeck at 914-720-1075.

Two New Club Policies:

1) As a few members have been lucky enough to win the raffle computer repeatedly, the board voted the following: As of the March 2015 meeting, member/family member may only win the raffle computer once during any six-month period, giving other members a fair chance to take home the big prize.

2) The board voted to have complimentary light refreshments occasionally at the general meetings. These could be either a fruit plate or a cookie platter or donuts and coffee. Come enjoy the evening—and nibble.

Upcoming Presentations at Greenburgh Public Library

Beginning on March 15 and continuing for several months, three WPCUG members will speak at Greenburgh Public Library, 300 Tarrytown Road, Elmsford. On the March date, Richie Nayman will lead the series, covering "Technology Today," which will include a range of issues such as the cloud, privacy, and troubleshooting; on April 12, Jimmy Iscaro will present "All Things Apple," discussing Apple/Mac devices; and on May 10, Pierre Darmon will demonstrate "Watson," the well known "Jeopardy" (and winning) challenger. The events, from 2 to 3:30 p.m., are free and open to the general public.
