What is AI?

Everyone thinks they know but no one can agree. And that's a problem.

AI is sexy, AI is cool. AI is entrenching inequality, upending the job market, and wrecking education. AI is a theme-park ride, AI is a magic trick. AI is our final invention, AI is a moral obligation. AI is the buzzword of the decade, AI is marketing jargon from 1955. AI is humanlike, AI is alien. AI is super-smart and as dumb as dirt. The AI boom will boost the economy, the AI bubble is about to burst. AI will increase abundance and empower humanity to maximally flourish in the universe. AI will kill us all.

What the hell is everybody talking about?

President's Message

As you surely know by now, Tuesday, August 6, was our first in-person General Meeting since March 5, 2020, when we met at Keller Williams. More than four years have passed (1615 days to be exact, but who is counting?) but we never stopped meeting, on Zoom admittedly. But this was also our first ever Hybrid General Meeting. We had a better in-person attendance than originally planned, in spite of a very heavy rain. With this new arrangement, I certainly hope that we will continue to have record attendance, both in-person and online.

I also wanted to share with all of you that our new website is almost ready for general public access. We have made it available for review to all board members. We have collected their feedback and are addressing issues and suggestions. We hope to make it available to everyone in the not-too-distant future. This is very exciting news because we have been working at it for about two years.

Fake phone calls, emails, and text continue to abound. They are getting more sophisticated every day and are targeting a section of the population that is well known to be more vulnerable: us, seniors. Any pressure tactic, poor grammar, or spelling mistakes is a red flag that should immediately raise eyebrows and your suspicion. But scammers are getting smarter every day. So a perfectly written email or text is not a guarantee of legitimacy. So please please please, be on your guards, be vigilant, and be safe.

Dr. Pierre Darmon

The 10 Safest Free Software Download Sites for Windows

In many cases, you should stick to official software websites for the safest downloads. You'll avoid malware and bundled junk by downloading directly from the homepage of popular software.

Ninite is a trustworthy resource for bulk installation of essential Windows software. It automatically declines toolbars and junk, ensuring a secure and hassle-free experience.

Many other sites for free downloads are also available, with their own minor advantages.

Why every quantum computer will need a powerful classical computer

Error-correcting a quantum computer can mean processing 100TB every second.

The unsolved piece that is being addressed is the huge amount of classical computations that are going to be necessary to make the quantum hardware work. Specifically, it's targeting the huge amount of data processing that will be needed for a key part of quantum error correction: recognizing when an error has occurred.

Wild elephants may have names that other elephants use to call them

Wild elephants seem to address each other using distinctive, rumbling sounds that could be akin to individual names.

That's according to a provocative new study in the journal *Nature Ecology & Evolution*, which was inspired by earlier work showing that bottlenose dolphins have signature whistles.

'Supermodel granny' drug extends life in animals

A drug has increased the lifespans of laboratory animals by nearly 25%, in a discovery scientists hope can slow human ageing too.

The treated mice were known as "supermodel grannies" in the lab because of their youthful appearance.

They were healthier, stronger and developed fewer cancers than their unmedicated peers.

The drug is already being tested in people, but whether it would have the same anti-ageing effect is unknown.

Expect Auroras, Solar Flares and More Space Weather from the Solar Maximum

Aurora sightings may become more common, and satellite communications and power grids could be disrupted, as solar activity peaks. Our nearest star is always volatile, but its magnetic action waxes and wanes on an 11-year loop. The sun is thought to be in a peak now, although scientists will need another year or two to analyze data before they can say for sure.

Happy 50th birthday to the UPC barcode – no one expected you would revolutionize global commerce

The first modern barcode was scanned 50 years ago this summer – on a 10-pack of chewing gum in a grocery store in Troy, Ohio.

Fifty is ancient for most technologies, but barcodes are still going strong. More than 10 billion barcodes are scanned every day around the world. And newer types of barcode symbols, such as QR codes, have created even more uses for the technology.

A plotter is a machine that produces vector graphics drawings. Plotters draw lines on paper using a pen, or in some applications, use a knife to cut a material like vinyl or leather. In the latter case, they are sometimes known as a cutting plotter.

In the past, plotters were used in applications such as computer-aided design, as they were able to produce line drawings much faster and of a higher quality than contemporary conventional printers. Smaller desktop plotters were often used for business graphics.

Plotters are used primarily in technical drawing and CAD applications, where they have the advantage of working on very large paper sizes while maintaining high resolution. Another use has been found by replacing the pen with a cutter, and in this form plotters can be found in many garment and sign shops.

Plotters offered the fastest way to efficiently produce very large drawings or color high-resolution vector-based artwork when computer memory was very expensive and processor power was very limited, and other types of printers had limited graphic output capabilities.

Tesla Sued Over Another Autopilot Crash Death

Another lawsuit has been filed against Tesla over its Autopilot system, this time from the parents of a motorcyclist who was killed in a crash with a Model 3.

The crash happened while the Tesla driver had Autopilot engaged. The parents, who also sued the driver of the Tesla, said the Autopilot sensors "should have identified the hazard posed by" the motorcycle. The vehicle hit the bike going between 75-80 miles per hour, Reuters reports.

ALL WORKSHOPS ARE ONLINE

TechEdConnect® has workshops for everyone who uses a computing device. Some workshops have a formal classroom-type approach; others are informal meetings where ideas and problems are discussed. Below is a list of the various workshops and the leaders.

PHOTO & VIDEO EDITING Jim Iscaro

Learn to take pictures off your phone or camera, save them in an organized manner, back them up, and select the best. We then edit them so they look like the picture we wanted to take. We'll use an easy photo editor that is available in Windows and Mac and we will cover apps on Android and iOS devices.

TECHNOLOGY Anthony Tedesco

Meeting starts with discussions on any related area of technology attendees feel interested in. Followed by a presentation on a different technology topic each month.

NAVIGATING WINDOWS (*Alternating months*) Pierre Darmon

Q&A to address questions on Windows, from printing to device drivers, from changing default apps to addressing performance issues, and much more.

THE CURIOUS LION John Moore

What to do if a light does not light. What to do when your hair dryer will not turn on. How to map the circuits in your breaker panel. How to hook up a generator if you don't want to hire an electrician. How a 208-volt circuit differs from a 120-volt circuit. Bring your questions to find answers.

UPGRADE & REPAIR Jonathan Hauff

We cover hardware and software. The good, fun, and bad stuff. Sessions feature adding to your PC (cameras, phones, mass storage, backups) and upgrades; error messages; stubborn installations; dreaded “blue screens of death,” conflicts, and buggy programs, virus/spyware/identity issues and how to understand and solve them all!

DIGITAL CAMERAS Allan and Heather Turnbull

Do you want to know about the symbols and buttons on your camera? Do you want to know how to take a decent picture, download your pictures to your computer, and send them by email? Bring your digital camera and manual. We show you how to use it in a relaxed, informal, and hands-on environment.

ALL THINGS MOBILE

A roundtable discussion of Android and Apple devices. Share your phone and tablet experiences, apps, and favorite websites. We'll learn together. You don't need a device; we'll share ours with you. Open to all levels.

OFFICE SUITES George Hauss

Ah, you think you are an expert and don't have to come to George Hauss' workshop? In fact, George has been piling in the tips and tricks that make MS Office, LibreOffice, OpenOffice, and even the Mac Office Suite (iWork) much quicker and easier to use. Bring your own shortcuts to share. Put this workshop on your calendar and learn what you think you already know.

APPLE FOR BEGINNERS (*Alternating months*) Pierre Darmon

This workshop is geared for beginners. It is conducted as a Q&A for the most part. We cover all things Apple, from the Mac to the iPhone, iPad, Apple Watch, AirTags, and their relationship.

CULTURAL TECHNOLOGY David Lerner

Recent discussions on archaeology, gorgeous stained glass windows, World War II history, ships from the classical age. David Lerner shares his many interests with us and holds our attention throughout his workshop.

EXPLORING SOFTWARE Pierre Darmon

A different topic each month. Topics span from computer security to the paperless office to Chromebooks and printers, just to name a few.

Quotes by Sigmund Freud

Attributed to Freud, no evidence
Sometimes, a cigar is a cigar.

I can most highly recommend the Gestapo to everyone. See the blog post by Michael Thaler

Health is the ability to love and work.

Before you diagnose yourself with depression or an inferiority complex, make sure you're not just surrounded by assholes.

Documented quotes

Not all men are worthy of love

Civilization and its Discontents. The complete psychological works of Sigmund Freud. London 1961: Hogarth

With the help of the necessary boldness and lack of conscience it is not difficult to amass a large fortune, and for such services a title will of course be a suitable reward.
Jokes and their Relations to the Unconscious. The complete psychological works of Sigmund Freud. London 1961: Hogarth

To be healthy is wonderful if one isn't condemned to be alone.

Ernst L. Freud: The Letters of Sigmund Freud. New York, 1961: Basic Books. April 29, 1885, to Martha Bernays

A human being is so miserable when all he wants is to stay alive.

Ernst L. Freud: The Letters of Sigmund Freud. New York, 1961: Basic Books. Aug.14 1885, to Martha Freud

By making our enemy small, mean, contemptible, comical, we take a roundabout route to getting for ourselves the enjoyment of vanquishing him, which the third person – who has gone to no effort – endorses with his laughter.

Sigmund Freud, The Joke and Its Relation to the Unconscious. Translated by Joyce Crick with an Introduction by John Carey. London (Penguin Books Ltd.) 2002, p. 100.
