**COVID-19, flu and RSV shots
– an epidemiologist explains
why all three matter this fall**

Note

The Food and Drug Administration approved and granted emergency use authorization on Aug. 22, 2024, for the newest, updated version of the COVID-19 vaccine.

The 2024 summer wave of COVID-19 cases is a good reminder of why people need to stay up to date with their vaccines.

As the fall and winter seasons approach, the usual seasonal respiratory viruses, including flu and respiratory syncytial virus, or RSV, will also be on the rise. Vaccines are now available to help protect against these viruses.

President's Message

Earlier this month, we held our second hybrid General Meeting. Again, it was a big success, in spite of some technical issues. We again had a large attendance, so that is a good indication that we are doing the right thing, and that members are appreciative of the choice they now have in attending in person or on Zoom. Unfortunately, I was unable to make that second hybrid meeting for unforeseen personal reasons.

Due to this unforeseen travel and another planned travel this month, the progress on the new website has slowed down a bit. So Linda Iannuzzo, Jim Iscaro and I jointly decided to postpone the launch of the new website until later. It could happen towards the end of this month, or early next. But I can assure you that you will not be disappointed, and will even be pleasantly surprised. We still have a few things to take care of, along with addressing minor issues that board members have discovered while testing the website.

The APCUG annual contests for e-bulletins, newsletters, and websites is already underway. We have until Sept 27th to submit entries. We hesitated to submit the newsletter and the website (you can only win one anyway). We decided to only submit the newsletter, which had over a year to mature in its new format, whereas the new website is still in its relative infancy. We will submit the new website next year when we will have had time to refine it.

Most discussions of retirement focus on the financial aspects of leaving the workforce: “How to save enough for retirement” or “How do you know if you have enough money for retirement?”

But this might not be the biggest problem that potential retirees face. The deeper issues of meaning, relevance and identity that retirement can bring to the fore are more significant to some workers.

Retirement doesn't just raise financial concerns – it can also mean feeling unmoored and irrelevant

Practical uses for quantum computers are emerging in chemistry, promising to speed the development of materials, catalysts, and drugs

The core of this quantum computer looks familiar enough: a silicon chip the size of a stamp. But the resemblance to your laptop ends there. The chip, cocooned within a vacuum chamber and cooled nearly to absolute zero, is patterned with 198 gold electrodes, arranged like an oval racetrack.

Here's What the Inside of an Airbus Factory Looks Like

In Hamburg, aviation giant Airbus is transforming aircraft production with state-of-the-art robotics technology on its planes. We go on a behind-the-scenes visit for the delivery of an A321neo.

An Airbus A321neo has just under half a million pieces, from the seven sections of fuselage down to the rivets used to secure its surfaces, making it one of the most complex jigsaw puzzles ever created. As well as needing to be combined, all the components have to be verified, tested, and recorded in a logbook that never leaves the aircraft. It catalogs the history and traceability of all its components.

'Electric Vehicle Charging Infrastructure in the U.S.

64% of Americans live within 2 miles of a public charging station, and those who live closest to chargers view EVs more positively.

And a Pew Research Center survey paired with an analysis of U.S. Department of Energy data finds that roughly six-in-ten Americans now live within 2 miles of a public charger. There were over 61,000 publicly accessible electric vehicle charging stations in the United States as of February 2024.

Intel's 'Raptor Lake' Bug Patch Is Here: How Much Does It Affect Performance?

The bug biting Intel's 13th and 14th Gen Core desktop chips is a big deal. We test the effect the first major patch has on CPU speed, power consumption, and operating temperatures.

Anyone who has seen Jurassic Park should realize that raptors are indeed a huge issue. Jokes aside, Raptor Lake processors have become a major problem.

William Henry Mauldin

Articles

William Henry Mauldin (/ˈmɔːldən/; October 29, 1921 – January 22, 2003) was an American editorial cartoonist who won two Pulitzer Prizes for his work. He was most famous for his World War II cartoons depicting American soldiers, as represented by the archetypal characters Willie and Joe, two weary and bedraggled infantry troopers who stoically endure the difficulties and dangers of duty in the field. His cartoons were popular with soldiers throughout Europe, and with civilians in the United States as well. However, his second Pulitzer Prize was for a cartoon published in 1958, and possibly his best-known cartoon was after the Kennedy assassination.

"I feel like a fugitive from th' law of averages."

He published six cartoons a week.[6] His cartoons were viewed by soldiers throughout Europe during World War II, and were also published in the United States.

The War Office supported their syndication,[7] not only because they helped publicize the ground forces but also to show the grim side of war, which helped show that victory would not be easy.[8]

Which Climate Policies Work Best? This New Study Offers Clues.

According to a new study out Thursday in the journal Science, countries have managed to slash emissions by putting a price on carbon, but the biggest cuts came from adopting a combination of policies. Seventy percent of the instances where countries saw big results were tied to multiple actions that generated “synergy.”

ALL WORKSHOPS ARE ONLINE

TechEdConnect® has workshops for everyone who uses a computing device. Some workshops have a formal classroom-type approach; others are informal meetings where ideas and problems are discussed. Below is a list of the various workshops and the leaders.

PHOTO & VIDEO EDITING Jim Iscaro

Learn to take pictures off your phone or camera, save them in an organized manner, back them up, and select the best. We then edit them so they look like the picture we wanted to take. We'll use an easy photo editor that is available in Windows and Mac and we will cover apps on Android and iOS devices.

TECHNOLOGY Anthony Tedesco

Meeting starts with discussions on any related area of technology attendees feel interested in. Followed by a presentation on a different technology topic each month.

NAVIGATING WINDOWS (*Alternating months*) Pierre Darmon

Q&A to address questions on Windows, from printing to device drivers, from changing default apps to addressing performance issues, and much more.

THE CURIOUS LION John Moore

What to do if a light does not light. What to do when your hair dryer will not turn on. How to map the circuits in your breaker panel. How to hook up a generator if you don't want to hire an electrician. How a 208-volt circuit differs from a 120-volt circuit. Bring your questions to find answers.

UPGRADE & REPAIR Jonathan Hauff

We cover hardware and software. The good, fun, and bad stuff. Sessions feature adding to your PC (cameras, phones, mass storage, backups) and upgrades; error messages; stubborn installations; dreaded “blue screens of death,” conflicts, and buggy programs, virus/spyware/identity issues and how to understand and solve them all!

DIGITAL CAMERAS Allan and Heather Turnbull

Do you want to know about the symbols and buttons on your camera? Do you want to know how to take a decent picture, download your pictures to your computer, and send them by email? Bring your digital camera and manual. We show you how to use it in a relaxed, informal, and hands-on environment.

ALL THINGS MOBILE

A roundtable discussion of Android and Apple devices. Share your phone and tablet experiences, apps, and favorite websites. We'll learn together. You don't need a device; we'll share ours with you. Open to all levels.

OFFICE SUITES George Hauss

Ah, you think you are an expert and don't have to come to George Hauss' workshop? In fact, George has been piling in the tips and tricks that make MS Office, LibreOffice, OpenOffice, and even the Mac Office Suite (iWork) much quicker and easier to use. Bring your own shortcuts to share. Put this workshop on your calendar and learn what you think you already know.

APPLE FOR BEGINNERS (*Alternating months*) Pierre Darmon

This workshop is geared for beginners. It is conducted as a Q&A for the most part. We cover all things Apple, from the Mac to the iPhone, iPad, Apple Watch, AirTags, and their relationship.

CULTURAL TECHNOLOGY David Lerner

Recent discussions on archaeology, gorgeous stained glass windows, World War II history, ships from the classical age. David Lerner shares his many interests with us and holds our attention throughout his workshop.

EXPLORING SOFTWARE Pierre Darmon

A different topic each month. Topics span from computer security to the paperless office to Chromebooks and printers, just to name a few.

Quotes by Khalil Gibran

In the Arab world, he is regarded as a literary and political rebel but he is widely respected as a great thinker and his work offers some interesting insights into life and its meaning.

o belittle, you have to be little. ~Khalil Gibran

We are all like the bright moon; we still have our darker side. ~Khalil Gibran

The smallest act of kindness is worth more than the greatest intention. ~Khalil Gibran

Friendship is always a sweet responsibility, never an opportunity. ~Khalil Gibran

You may forget with whom you laughed but you will never forget with whom you wept.

~Khalil Gibran

If you reveal your secrets to the wind, you should not blame the wind for revealing them to the trees. ~Khalil Gibran

Out of suffering have emerged the strongest souls; the most massive characters are seared with scars. ~Khalil Gibran

Ever has it been that love knows not its own depth until the hour of separation. ~Khalil Gibran

t takes a minute to have a crush on someone, an hour to like someone, and a day to love someone, but it takes a lifetime to forget someone. ~Khalil Gibran

Generosity is giving more than you can, and pride is taking less than you need. ~Khalil Gibran

You give but little when you give of your possessions. It is when you give of yourself that you truly give. ~Khalil Gibran

To understand the heart and mind of a person, look not at what he has already achieved, but at what he aspires to. ~Khalil Gibran

They deem me mad because I will not sell my days for gold, and I deem them mad because they think my days have a price. ~Khalil Gibran

You talk when you cease to be at peace with your thoughts. ~Khalil Gibran

Trust in dreams, for in them is the hidden gate to eternity. ~Khalil Gibran
